Company Overview

Pecan AI is a cutting-edge technology company offering an automated predictive analytics platform that empowers analysts with fast, intuitive machine-learning capabilities, no data science expertise required.

Our Vision

Empowering businesses to evolve and grow with easy-to-use AI.

Our Mission

Transforming data analysts into predictive powerhouses.

Product

Pecan's platform enables data analysts to build predictive models in days, not months, through its fusion of generative AI, auto-generated SQL, automated feature engineering, and AutoML, enhancing business value and data-driven strategies.

Milestones

- January 2024: Launched Predictive GenAI capabilities
- May 2023: Platform available for self-service signup
- May 2022: Named to CB Insights AI 100 list
- February 2022: Raised \$66M Series C
- May 2021: Raised \$35M Series B
- January 2020: Raised \$11M Series A
